

# TET-EMTRON

## TEV-4

4 BAND VERTICAL.  
40,20,15 and 10 meters.

### Description

The "TET-Emtron™" model TEV-4 is an optimum performance four band vertical antenna. A high efficiency trap, all stainless steel hardware and rugged aluminium construction guarantee long and trouble-free operation. It can be mounted at ground level or elevated to any height above ground or a roof. It comes complete with one resonant set of waterproof radials. As many sets as desired can be added for greater efficiency.

If any tuning within the bands is needed, it is done by adjusting the length of the radials

The antenna is all predrilled and by following the instructions, you will find that the antenna is simple to assemble and a good performer.

### Specifications

FREQUENCY	7,14, 21, 28 MHz
ELEMENT HEIGHT	4150 mm
FEED IMPEDANCE	50 OHM
MAXIMUM RADIAL LENGTH	10.7 Meters
SWR	1.5 or less
POWER RATING	1 Kw PEP
